There's No Comparison!

Mickey is the moving body innovation leader. Since 1904 we've been credited with some of the most important new products and unit feature breakthroughs in our core customer industries. In dry freight van bodies, our commitment to quality has redefined the industry standards for premium features, such as 1-1/8" thick domestic laminated oak floors, full-width front sill for front wall reinforcement, 2" rivet spacing for exterior skin attachment, and full height rear doors with drip rails above the panels with 5 heavy duty hot dipped galvanized steel hinges. It's all part of our 100% quality commitment.
