SUPERFINETM

REPROCESSED

A SuperFineTM liner is the single best investment you can make for your dump truck or trailer

Prevent these hazards with your SuperFineTM liner

Cracked Tailgate Hinge High speed brake and release dumping bangs the tailgate against the truck body, damaging the hinge and releasing load sporadically.

Exposed Cylinder Full extension of hoist due to high dump angle exposes all five stages. This puts unnecessary stress on the smallest cylinder and causes seals to leak hydraulic fluid.

High Dump Angle Load will not release, forcing driver to raise trailer higher and increase risk of tipping.

Washboard Floor Without impact and abrasion protection the trailer floor is substantially weakened.

Thin Floor Constant wear on the last ten feet of the trailer has worn the floor paper thin.

What is SuperFineTM?

SuperFineTM reprocessed liners are made from clean virgin UHMW, ground and pulverized into tiny particles that are pressed into sheet material. This process of high temperature and pressure forms a material with even better wear characteristics than virgin material.

Custom Made

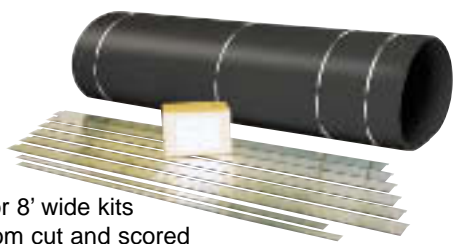

SuperFineTM is the only truly custom made liner, not just pulled off the shelf and cut from a roll. Whether it's SuperFineTM or DiamondSlideTM, your bedliner will be custom made and scored in the factory precisely for your trailer specs and hauling application.

SuperFine is Low Cost

A SuperFineTM liner has the same characteristics of a virgin liner and **costs 25% less!**

Not all reprocessed UHMW is the same!

Take a closer look at the material. If you can see large multi-colored chunks of material, you are buying "marbled" material that may contain impurities and have poor welding properties. The finer the grains, the more consistent the weld.

12', 10' or 8' wide kits are custom cut and scored precisely to your trailer dimensions and include all mounting hardware.

Your truck with a custom made **SUPERFINE**TM
REPROCESSED
liner protecting it...

You'll carry more loads with less haul-back, extend the life
of your equipment and reduce the chance of tipping.

Safe Low Dump Angle

Loads release quickly and easily
at low, safe dump angles.

Strong Flat Floor

The original floor is as strong
as ever, thanks to **SuperFine**TM's
impact and abrasion resistance.

Safe Productive Driver

The driver is confident and
productive, operating comfortably
from inside the cab where he
should be!

**Deliberate &
Controlled Dumping**

Place your load exactly
where you want it with
smooth and
predictable load
release. No
more slam
dumping.

**BEST
VALUE!**

SuperFineTM liners are
factory scored and custom
made from reprocessed
UHMW!

4X tougher
than aluminum

2X tougher
than steel

10 FT. and 12 FT. wide
covers more than just the
floor

SUPERFINETM
REPROCESSED

A custom liner for all your hauling needs

- Reprocessed UHMW (Ultra High Molecular Weight) material.
- Used for the most abrasive, high impact application.
- 4 x tougher than aluminum at half the weight.
- 2 x tougher than steel.
- 18 month warranty and 100% satisfaction guaranteed!
- Costs 25% less than virgin liners!

Try a bedliner for 90 days risk free and
prevent this \$8,500 nightmare.
