

Hook-All™ Hooklifts

BY AMERICAN ROLL-OFF®

Model HAS-200 for 130" – 140" C.A., 54" Hook Height 20,000 Lbs. Capacity

Hook-All® Hooklifts are an easy way to increase your truck utilization. Our Hook Lift Hoist will allow a single chassis to load, unload, and dump a variety of containers or bodies.

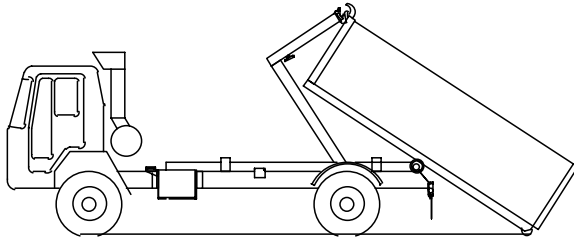

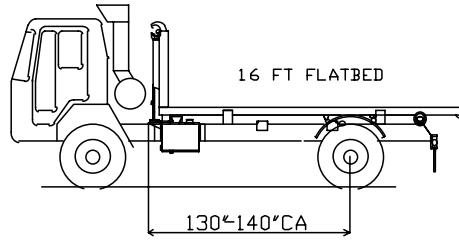

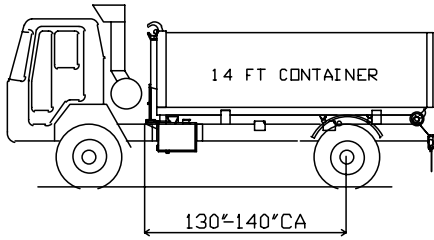

STANDARD HOOKLIFT FEATURES INCLUDE:

- Easily picks up and dumps 14 foot Containers and 16 foot Flatbeds
- Dual Lift Cylinders for added strength and stability
- Sliding jib design to adjust weight distribution
- Three point container securement systems locks both front and rear of container
- Single articulation point design features less moving parts
- Single rear rollers with aluminum bronze bushings
- Inside cab controls never require the operator to leave the cab
Electric or Air controls, optional
- Low pressure 2,800 PSI hydraulics operated with gear style pump, easily adapts to low pressure accessories
- Designed and manufactured in the United States
- Poly Fenders with full width bumper
- Pintle hook mounting plate is standard on all units
- LED stop turn and marker lights with plug in wire harness
- All models include an A-Frame drawing so you can manufacture your own bodies
- Longer bodies can be loaded or unloaded with the addition of an ICC bumper
- Also available with a 54" Hook Height
- Load holding valve on jib cylinder
- Poly Fenders with full width bumper
- Sealed beam Lighting with plug in wire harness

(Designed for Chassis G.V.W. of 26,000 to 33,000 Lbs.)
