## COLUMNLIFT LIFT GATES

Columns are  
now 7"  
shorter!

**The shorter columns will allow the BMR-A to fit on truck bodies with very low clearance levels. The new design is also ideal for gas bottle operations and stakebed applications where overhang may be an issue.**

- An additional Deutsche connector was added to the base of the runner.
- Enables haulers to increase their load capacity by 80 lbs. due to the reduced amount of steel in the liftgate. This now makes the aluminum version of the BMR-A-66 859 lbs. lighter than the competitor's liftgate.
- The extension plates are now bolted on instead of welded.

For additional information, please contact Customer Service at 800.227.4116.

## BMR-A SERIES

**Wiring Harness:** Deutsche Electrical Connectors are watertight and have a snap-together fitting that ensures uninterrupted contact, eliminating corrosion problems.

**Roller Design:** The Quick Release Design allows for easy inspection and replacement of roller assemblies.

**Opener Arms:** New Opener Arms design ensures that the platform will stay tight and secure during transit.

**Face Seal Connections:** Create a secure hydraulic system by using O-rings at all contact points, greatly reducing the chance of system leaks.

**Potted Switches:** Keep out dirt, oil, grime and moisture. Potted Switches eliminate corrosion and premature switch failure.

**Pump & Motor Assembly:** One easy-to-install assembly saves hours of installation time. The Vertical Pump allows for more accessibility to components for maintenance and replacement purposes.

**Bottom Stops (Standard):** Does not allow platform to lower to ground at docks, which could result in costly repairs.

**Totally Automatic Locks:** The BMR-A is the only gate on the market that takes the driver out of the equation. The driver doesn't have to remember to lock the latches or to stop short of the dock to release the locks.

**LED Lights:** LED Lights burn brighter, last longer, use less energy, don't radiate heat and allow for a more flush fit to the column.
