

Crank ▶ N ▶ Go[®] II

New & Improved!

Aluminum Front Assembly.

Self-connecting cable alignment.

Automatic cable tensioning.

Low profile, positive-locking anti-lift device.

Crank N Go II

Safety, Security, Dependability & Productivity; Just Crank-N-Go!

Features & Benefits

Now tarping a dump is no trouble at all! With the Crank-N-Go tarping system from Aero Industries, you're covered in seconds -- with no climbing, no ropes to tie down, no hassles.

Crank-N-Go has a durable tarp attached to strong bows that slide along cables mounted on each side of your dump body or trailer. For extra safety, Crank-N-Go is operated from the ground or the cab. Just turn the crank on, flip the switch and the tarp and bows slide forward or backward over your load. It's that simple!

We've made significant improvements to Crank-N-Go over the years, too. Our newly redesigned AX4 model features an attractive, aluminum lightweight front assembly, adjustable rear idlers, and new anti-lift device that work together to keep the tarp secure and operational better than ever before.

Plus, Crank-N-Go is easy to install, maintain, and operate. It comes with a one-year warranty on all parts. And if you should ever need assistance, our customer service technicians are just a toll-free call away.

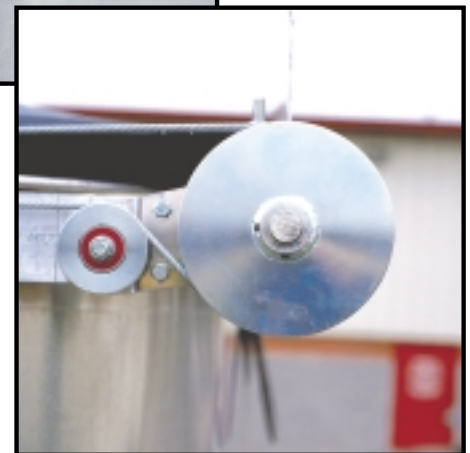

Aluminum Front Assembly

Aluminum (attractive, lightweight, no painting required).

Hidden axle

Second idler reduces cable slippage

Rear Idlers

Spring loaded design automatically keeps drive cables properly tensioned.

Rotating sheaves allow system to operate even if drive cables are out of proper alignment.

Anti-Lift

- Positive locking prevents tarp and bows from lifting.
- Smooth, easy operation.
- Low profile, prevents damage from loaders.

Drive Options: Electric or Manual

Electric motor drive - operates easily from the cab.

Manual crank drive chain or V-belt drive

Double V-belt manual drive for long cab shields

Bows

- Constructed of strong, steel tubing designed to slide easily along cables
- Located every 30" to cover load securely.
- 12", 6", Flat, and other rises available.
- Plastic glide bow ends facilitates cranking.

It's Easy to *Crank-N-Go II*

Untarped Position

When all the way forward, the Crank-N-Go system uses very little space. Front end loaders can easily fill your body or trailer without bows being in the way.

1/3 Covered

To cover your load, simply crank from the ground or cab—no more climbing! Crank-N-Go is safe and easy.

2/3 Covered

Bows glide along durable cables to cover your load quickly. With arched bows, loads are cleared easily.

Completely Tarped

Your load is covered in a matter of seconds — from the ground, with nothing to tie down.

When we say Crank-N-Go, that's exactly what we mean!
