Industries, Inc.

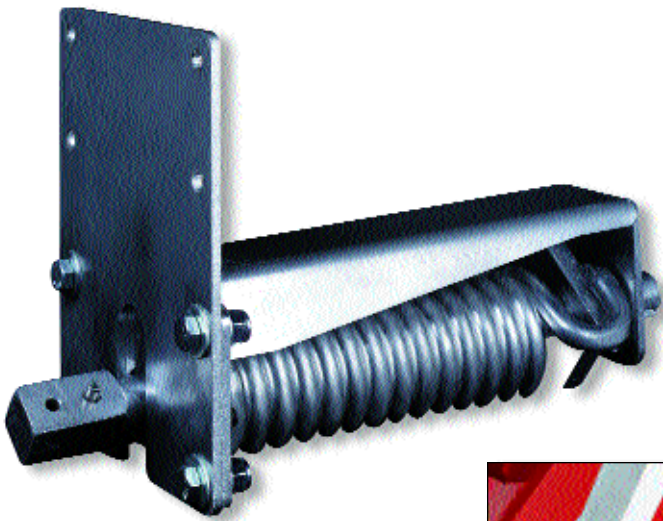

2 Great Spring Options.

PowerPack Sidemount Spring Assembly

PowerPack Installation

Undermount/Underbody Spring Assembly

Any automatic arm tarping system is only as good as its springs. That's why, when Aero created the Easy Cover, we equipped it with the industry's strongest, most durable undermount/underbody torsion springs. They're designed for a lifetime of rugged, day-to-day use in your most demanding tarping and driving conditions.

But we didn't stop with making the springs tough. We also created the PowerPack Sidemount Spring Assembly. The industry's lowest profile, most attractive sidemount spring. Best of all, the polished aluminum castings protect the springs, while enhancing the products appearance.

Aero's springs are easy to install, with no welding required. Both models are designed so additional spring tension can be added if required.

Undermount Installation

Underbody Installation

Choose The Model That Works Best For You!

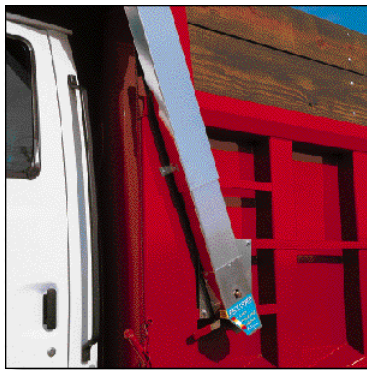

Count on Aero to give you the options you need to fit the way you work. You can choose aluminum or steel arms...two different front ends...and a huge variety of tarps...all carefully engineered and manufactured to Aero's industry-leading high standards. Aero also gives you a choice of 27 models and four different drive options – one to fit any budget and preference.

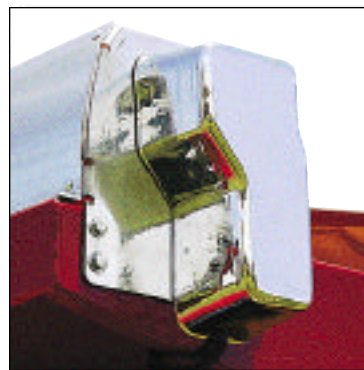

Direct Drive: Model 200/250/275
Covers your load quickly and easily, with just one hand, from the cab steps.

Cab Extension: Model 300/350/375
Features a crank extension to the cab for easier, more convenient one-handed operation.

Ground Level: Model 400/450/475
Gives you the convenience of one-handed cranking from the ground.

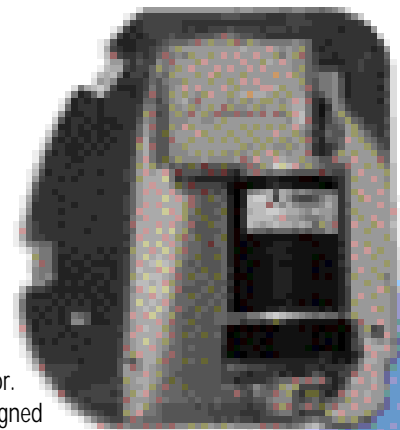

Electric: Model 500/550/575
The ultimate in convenience, featuring the PowerPlus motor.

More Advantages In Every Easy Cover

- All units in stock and ready for immediate shipment.
- Pre-assembled components reduce installation time by hours.
- Detailed schematics, with each part clearly numbered, eliminate guesswork in installation and ordering.
- Customer Service for ordering, application, and installation questions – 1-800-535-9545.
- One-year warranty on all parts.

Easy Cover Features & Benefits

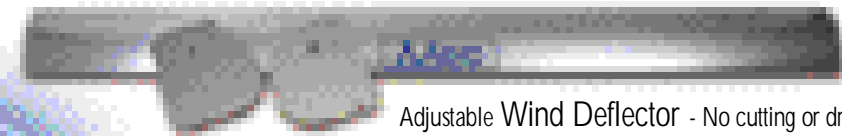

PowerPlus Motor

The industry's strongest, quietest, best-backed motor. Aero's PowerPlus was designed specifically for your application.

Aluminum Roll-up Bar.

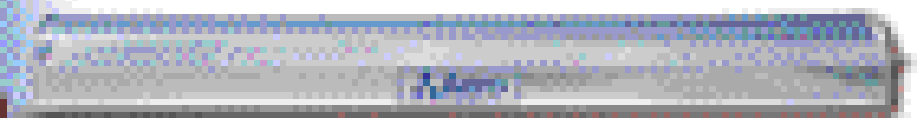

Another feature designed to speed installation! This new tarp roll-up bar eliminates drilling and attaches securely with nuts and bolts.

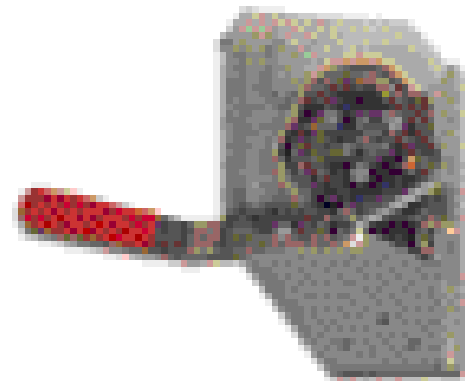

Adjustable Wind Deflector - No cutting or drilling required to assemble

Choice of front ends.

Choose from our one-piece adjustable wind deflector or our new aerodynamic preassembled tarp housing for even faster installation. Both reduce drag and extend tarp life.

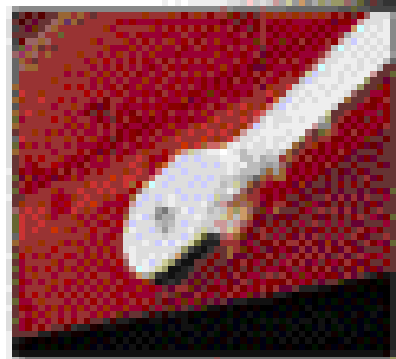

Pre-assembled Tarp Housing - Ideal for trailers with radius or diagonal front corner.

Model 200 Crank Assembly (shown without cover)

Smooth, one-hand operation. Positive locking ratchet and pawl, works in conjunction with friction brake to ensure safety and ease of operation.

PowerPack Sidemount Spring Assembly

The industry's lowest profile, best looking spring assembly. PowerPack springs are easily installed in polished castings, providing protection from the elements and the utmost in safety. Universal design eliminates the need for left and right springs.

Undermount/Underbody Spring Assembly

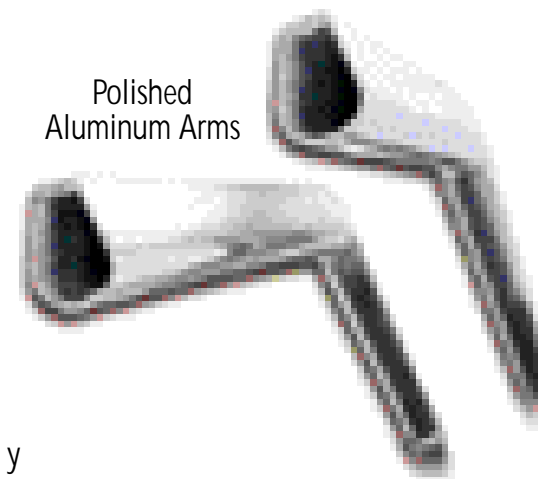

The Industry's Strongest Torsion Springs - Now Quick And Easy To Install! Aero's undermount torsion springs have always been the industry's strongest and most durable. And now they're easier than ever to install. There's no welding required. Simply bolt the spring in place, and it's installed in minutes. The new underbody installation option lets you mount the spring even higher, with only the spring shaft protruding past the bottom rail.

Steel Arms

Aluminum Or Steel Arms

The heavy-duty toughness of steel...or the lightweight performance of aluminum. With Easy Cover, the choice is yours. All are easy to install and adjustable to fit nearly any size dump.

Polished Aluminum Arms

*Also Available:

Wide variety of tarp options.

Choose the tarp that works best for asphalt, aggregate, debris, or whatever you're hauling. Two standard widths - 85" and 9' wide that is perfect for heaped loads.
