

# Side Kits

New Stronger "T" Stake.

Highest Quality Panels.

High Rise Bows.

Custom Fitted Tarps.

# Side Kit Features & Benefits

Aero invented Side Kits for flatbed trailers! They're the strongest, lightest Side Kits you can buy, with every component engineered especially for the job it's intended to do. If you have a load to haul, Aero has a Side Kit to keep the weather out and your load safe.

**Aerodynamic, Triangular Aluminum Stakes:** For maximum strength, minimum weight.

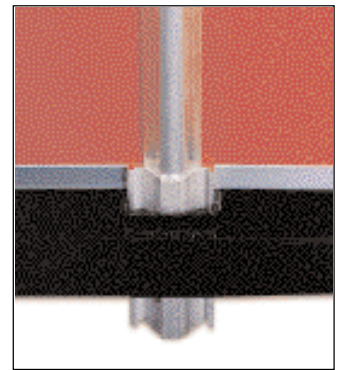

**Durable Tarps:** Wide variety of durable, 18 oz. and 22 oz. vinyl coated fabrics to fit your trailer.

**Aluminum Bows:** Solid 7/8" aluminum bows constructed of a special alloy designed to hold its shape for years of dependable service.

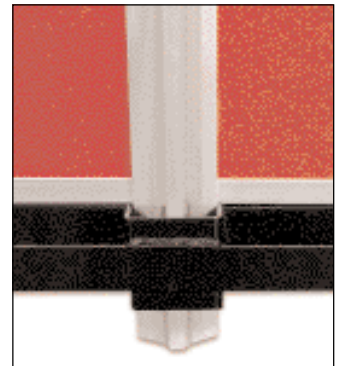

## Choice of High-Performance Panels:

- AeroLite® fiberglass panels filled tough; lightweight fluted or polystyrene core, and surrounded with a rigid aluminum frame.
- Attractive, low-maintenance Tuf-Kit fiberglass reinforced plywood panels (fiberglass on one or both sides.)
- 1/2" and 5/8" exterior-grade Douglas Fir with sealed and primed edges to keep out moisture.

Junior Kits are the lightest Side Kits available, with triangular junior stakes that provide great strength at minimum weight.

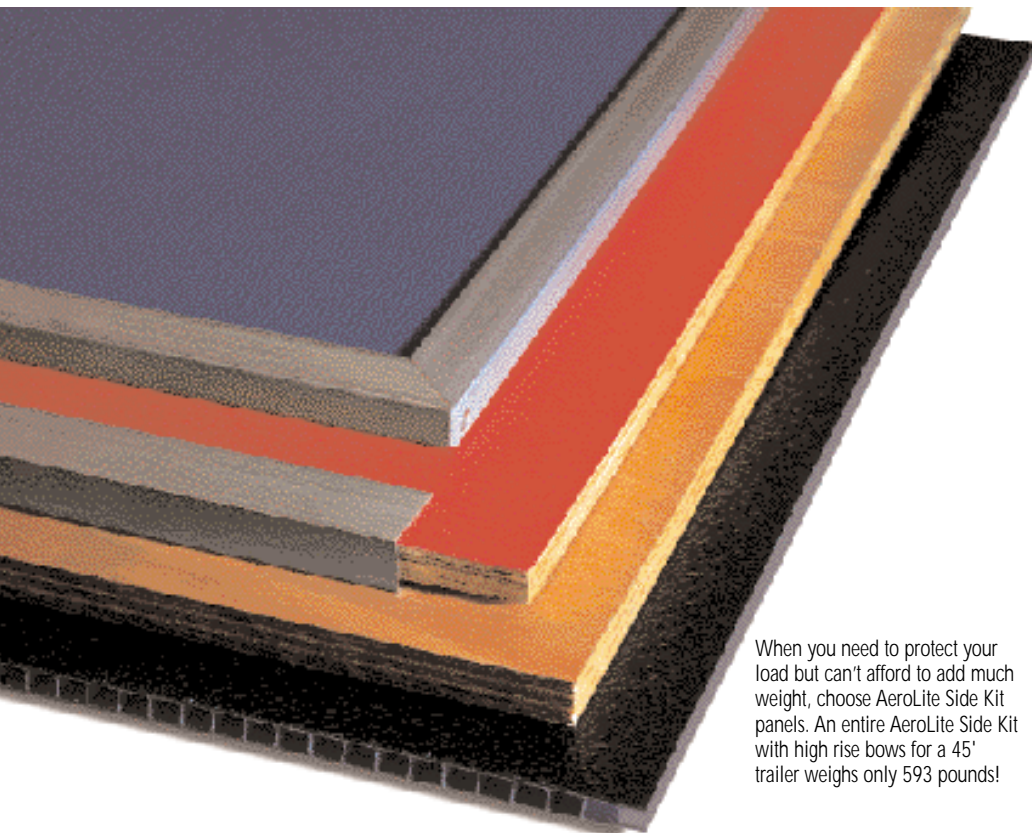

For the maximum in strength and durability, choose Aero's Standard stakes. The flared triangular stake design and extruded bow pockets stand up to the toughest use.

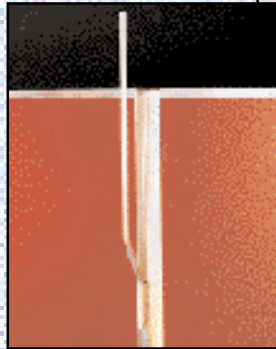

## Side Kit Configurations Available:

- **Junior Kits** – the lightest Side Kits available, with specially engineered Junior stakes that provide great strength at a minimum weight. Available with 1/2" plywood, Tuf-Kit, or AeroLite panels.
- **Heavy Duty Steel Kits** – with 5/8" plywood for your most rugged hauling needs. Featuring our strong, durable, Standard stakes set on 48" centers.
- **Grain Kits** – Specifically designed for hauling grain and other bulk commodities, with stakes on 24" centers and a unique rear end made for dumping loads.

When you need to protect your load but can't afford to add much weight, choose AeroLite Side Kit panels. An entire AeroLite Side Kit with high rise bows for a 45' trailer weighs only 593 pounds!

Bows fit into pockets that are extruded through their entire length for greater strength and durability.

Tarp stays conveniently hold your tarp when loading.

## Aero Side Kit Products- Makes Your Flatbed Even Better.

There are a lot of good reasons why we think Aero Side Kits for your flatbed trailers are the best you can buy.

For one, for more than 50 years, we've been creating innovative products that help you protect your load from the weather, store your equipment securely, and provide safety and dependability.

Everything Aero makes is engineered specifically to provide you with years of dependable, hassle-free service. Aero Side Kits are engineered to be the lightest and strongest you can buy, so you can haul more, with greater security.

Plus, you can count on Aero for all the parts, service, and application support you need. With five convenient locations — Indianapolis, Indiana; Omaha, Nebraska; Hamburg, Pennsylvania; Phoenix, Arizona; and Burlington, Ontario — and a wide network of Aero dealers, you can count on us for quick attention to your needs virtually anywhere in North America.

Your flatbed is one of the most valuable pieces of equipment you own. Let Aero show you how to get even more out of it with an array of innovative Side Kit products.

# Trust Aero For A Full Line Of Top Quality Truck And Trailer Accessories

You'll find a whole lot more than innovative Side Kit products at Aero. We manufacture a complete line of truck and trailer accessories, including tough, attractive StorMor® storage boxes in a wide variety of standard and custom configurations; DuraLite® bulkheads, and Conestoga® 2000 tarping systems for flatbed trailers. And you can always count on Aero for parts, service, and application assistance. To find out more, contact your Aero dealer or Aero today.
