# **SIDEWINDER**

**Automatic Transfer Trailer Covering System**

*Keep It Simple!*

# Only 20 Seconds...

## And you're back in business

## Is your current method of tarping unsafe, time consuming or requiring extensive maintenance?

Here's how the **SIDEWINDER** can help you...

### Safety

The **SIDEWINDER** operates safely from the ground and secures your load in only 20 seconds. Drivers no longer climb around high on their trailers pulling heavy tarps over peaked loads, risking a costly fall.

### Time Saver

On average, the **SIDEWINDER** saves 2½ hours a day over hand-tarping. Use that time to haul an extra load per day and Sidewinder will pay for itself in only 60 days.

### Low Maintenance

With self-contained hydraulics, hinges on only one side and a tarp that can be repaired with simple plastic zip ties, the **SIDEWINDER** is the lowest maintenance automatic covering system on the market.

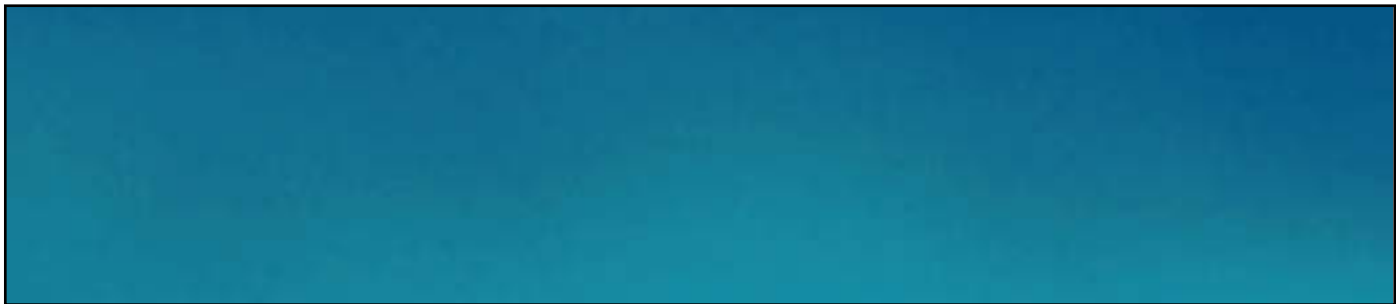

## "Best system I've seen for covering transfer trailers!"

Billy Cox  
Transfer Station Manager  
City of Prattville, Alabama

## Manual Tarp vs. ~~SIDEWINDER~~

	Manual Tarp	Sidewinder
Time to cover (average)	30 minutes	20 seconds
Time to uncover (average)	10 minutes	20 seconds
<b>Total time:</b>	40 minutes	<b>40 seconds</b>

Time saved per load with Sidewinder: 39 minutes  
39 minutes x 4 loads per day = **2½ Hours Saved!**

## Sidewinder's "Keep It Simple" Design...

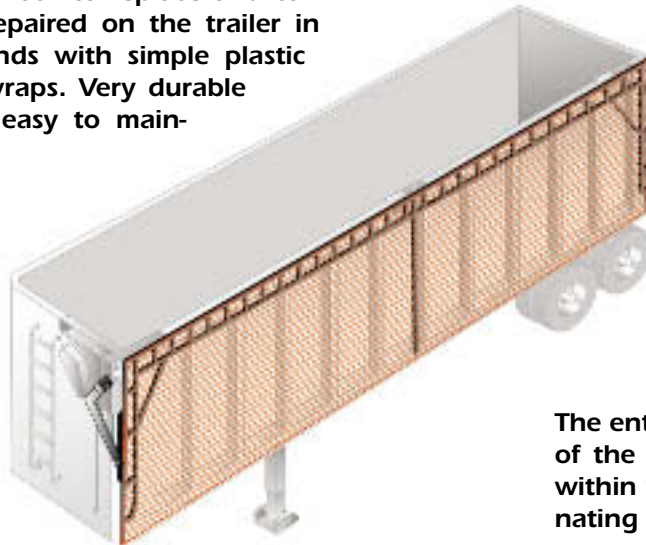

The tarp is made of high density polyethylene. It takes 1 man-hour to replace and can be repaired on the trailer in seconds with simple plastic tie wraps. Very durable and easy to maintain.

The one piece pivoting lid design allows SIDEWINDER to cover peaked and uneven loads without snagging or dragging the tarp over sharp objects.

This system is fully automatic. Just push a button and 20 seconds later you're on the road. SIDEWINDER's self-contained hydraulics provide smooth, consistent operation with or without the truck connected.

The entire cover pivots to one side of the trailer, keeping everything within view of the operator, eliminating costly accidents.

**SIDEWINDER**  
Keep It Simple!

# **SIDEWINDER**

*Keep It Simple!*

## System Highlights

- Weight:** 675 pounds.  
**Length:** Adjusts to any length and width of transfer trailer (up to 53ft.).  
**Installation:** Approximately 16 man-hours.  
(2 men x 8 hours)  
**Fits:** Accommodates trailers with 90° fronts or radius fronts.  
**Variations:** Driver's side mount (Part# 2538).  
Curb side mount (Part# 2540).  
**Warranty:** Pump and hydraulic cylinder - 1 year.

## The Buzz About **SIDEWINDER**...

"When I was hand-tarpping, I was hauling 3 loads per day. Now with the Sidewinder, I'm hauling 4 to 5 loads per day, plus I'm getting home in time for my family to remember what I look like."

David Loertscher  
Driver - Overland Services, Inc.  
Fort Pierce, Florida

---

"The Sidewinder is virtually maintenance free.  
I love it! Everyone should have one."

Joe Depaola  
Driver - BP Trucking  
Ashland, Massachusetts

---

"The Sidewinder has made my job a lot easier. No hand-tarpping and less time at the landfill. I don't lose trash anymore, either. We used to send out a truck to pick up debris off the road at the end of the day. They don't have to pick up after my trailer anymore. It's quick and easy to use."

Steve Marino  
Driver  
City of Garland, Texas
