

TARPS

Knitted Black Mesh

Sample 1

- Most of our roll off tarp customers are switching to this light - weight, yet durable material.
- Rip resistant material holds up extremely well in waste applications.
- 12' x 26' tarp weighs just 14lbs! Compare this to a 33lb. PVC tarp of the same size. When you cover 8-10 loads a day, this makes a big difference.
- All hems are sewn with heavy duty webbing and have grommets every 2 feet.

Multi-Color PVC Mesh

Sample 2

- The industry standard for roll off tarps.
- Heavy - Duty webbing in all hems.
- Grommets every 2 feet.

Vinyl

Sample 3

- 18 oz. material.
- Waterproof
- Durable

Asphalt lumite

Sample 4

- Lighter than vinyl
- Water-resistant (not waterproof)

Safety Orange Dense

Weave Netting

Sample 5

- Our standard Sidewinder tarp material
- Lightweight, but strong HDPE (High Density Polyethylene)
- Same material used to make construction barrier fencing
- Flexibility allows it to conform to load for better containment
- Easy to repair in minutes with plastic zip ties

PVC / Poly Black Mesh

Sample 6

- Lightweight, but extremely durable
- Grommets every 2 feet
